

a front engagement part arranged at a front of the accommodating part;  
and

a rear engagement part arranged at a rear of the accommodating part,  
wherein the front engagement part has a front engagement member  
extending in a left-and-right direction and capable of displacement in a front-  
and-rear direction.

31. (New). A container body forming the container according to claim 13,  
the container body comprising:

a container body having an accommodating part for  
accommodating a sample therein;

a front engagement part arranged at a front of the  
accommodating part; and

a rear engagement part arranged at a rear of the accommodating  
part,

wherein the front engagement part has a front engagement  
member extending in a left-and-right direction and capable of displacement in  
a front-and-rear direction.

#### REMARKS

The above amendatory action is taken solely for the purpose of  
avoiding claim fees that would otherwise accrue due to the presence of  
multiple dependent claims.

Respectfully submitted,

WILLIAM R. EVANS
